## Chapter 2

# Der Große Saal (Rittersaal)

### How to use your own text for processing

1. Add a new Text item to the wikibase. link to wikibase new item the item should contain the following statements:
  - P57 (external link): link to the html file containing the new text
  - P46 (curator): Item of the curator. you may use an existing item like Q210 (Ulrike seeger) for test purposes
  - P53 (license): Item of a license for the text. e.g Q203 (CC BY-NC-ND 4.0 DEED )
  - P6 (is part of): set value to Q218 (Schlossanlage Weikersheim)
2. check if your new text item occurs in the list of selected text items: Link to wikibase query service
3. set parameter of `get_text()` to the id of your new text item e.g.: `get_text("Q209")`

### How to select images for processing

Images are selected via the sparql query. The method `get_img()` is capable of using a wikibase item id as parameter to select images with the property P6 (is part of) linking to the given item id.

1. select a valid location id from the query result: Link to wikibase query service
2. set parameter of `get_img()` to the id of your selected location item e.g.: `get_img("Q217")`
